## Objects

I'm a passionate web developer who transforms my ideas into effective, production-ready web products. I specialize in building interactive interfaces, improving user experience, and optimizing websites for search engines. I'm constantly exploring advanced technologies in React and Next to enhance my projects.

## Projects

### 1-Portfolio:

A personal website showcasing my skills and projects

Project link: <https://asaad-abo-faour.vercel.app/>

### 2- E-commerce store:

A website developed using HTML, CSS, and JS, using the Next JS framework, using an open-source API, Redux to manage the site's status, and compatible with all devices.

Features: Cart, Search, Filter Sections, mood(dark, light)

Project link: <https://online-store-blush-delta.vercel.app/>

### 3- Weather in Syria – Weather Web App:

A web application displaying weather conditions in Syrian cities using an open-source API. It was developed using HTML, CSS, JavaScript, the React framework, and the Material UI design framework, with state management via Redux. It features a responsive design that supports all devices and provides an Arabic and English user experience

Project link: <https://asaad65.github.io/Weather-in-Syria/>
